

horse stalls for top horses

...majestic design...

Excellent horse stalls for horses of high standing.

When it comes to creating exclusive horse stables, Corton is second to none. Our finely designed boxes with fitting names, such as the Kingly Stable, Rembrandt and Ratina, are a feast for the eye of the full-blooded horse lover and provide majestic quarters for the horse.

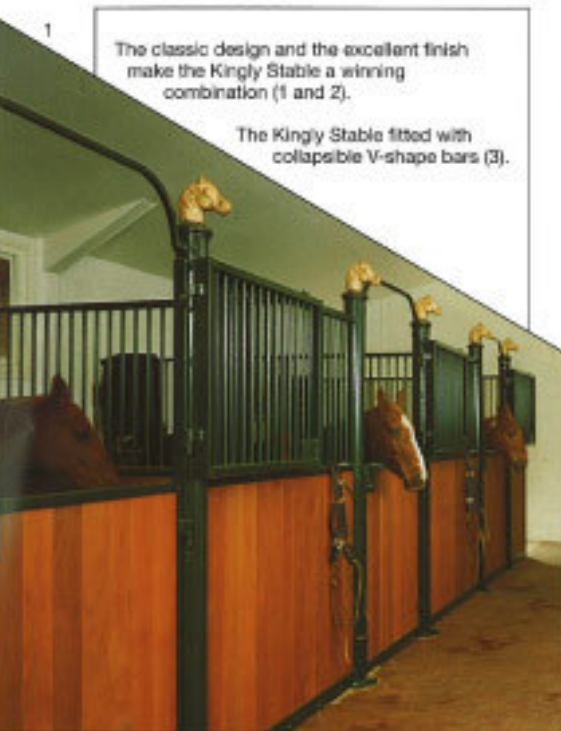

Guaranteed top quality.

Corton designer boxes are manufactured using the best techniques and materials. It is no coincidence that Corton has been a top name world-wide for more than 25 years. The horse stalls feature double inward-facing flanged profiles, strong bars and class 1 hardwood with the same humidity level found in an average stable.

Naturally, all metalwork has been fully galvanised according to NEN and ISO 1461 standards, which means even the out-of-sight inner surfaces have been sufficiently protected against corrosion. The galvanised metalwork can also be finished with a fine colour coating.

The classic design and the excellent finish make the Kingly Stable a winning combination (1 and 2).

The Kingly Stable fitted with collapsible V-shape bars (3).

The Kingly Stable, a royal stable.

The design of this classic horse stall has been inspired by traditional stables and based on the well-known Corton Professional box in its size and construction. The columned arch of the doorway is characteristic of the Kingly Stable, topped with stylish cast-aluminium horse's heads or chic golden balls featuring a top and bottom stable door and colour-coated metalwork. There is plenty of scope for the personal touch. For instance, the front wall can be decorated by the addition of brass rings, nameplates and nostalgic cast-aluminium lacing.

It is, of course, also possible to give the bars a contrasting colour to the frame, for example the stylish combination of a green frame with golden bars. The Kingly Stable is the top of the range in stable construction and is excellent quality. The Kingly Stable is available in all sizes.

Rembrandt horse stalls, creative and versatile.

The Rembrandt horse stalls are excellent for a creative stable layout. The optional slanting staggered front walls make it possible to create all kinds of interesting design layouts. With a little imagination, every corner of the stable can be put to use. The Rembrandt horse stalls typically feature decorative horizontal wooden plates. The doors can either be made of hardwood or steel bars. The posts are topped with a bronze cap.

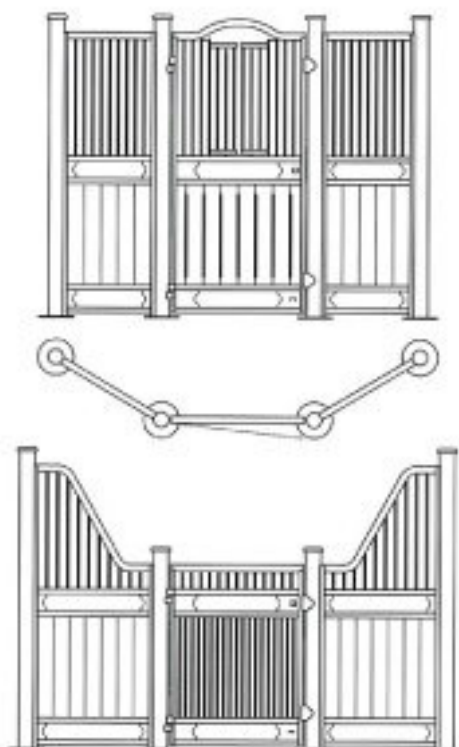

Artistic design with low staggered Rembrandt horse stalls (4).

An old coach house fitted with Corton's chic Kingly Stable entourage (5).

The Rembrandt box is available in two models. The first has a low single swing door, flanked by attractive swan-neck front wall sections; the second has a high, single swing door, flanked by high front wall sections.

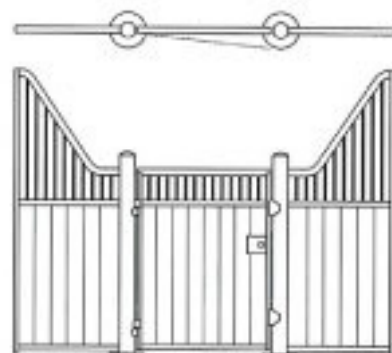

A double swing door is also available. Surprising constructions can be created by combining high and low Rembrandt wall sections. Both models can either be staggered or built in line. It goes without saying that the galvanised metalwork can be finished with a colour coating and the boxes can be made to measure.

Ratina, simplicity in design.

The Ratina horse stall is a variant of the Rembrandt. The front walls feature a half door flanked by swan-neck wings. The boxes are constructed in line and produce a particularly spacious effect with a good view of the horses.

The Ratina is based on the Corton Popular box in its size and construction. The hot-dip galvanised metalwork is available in the colour coating of your choice. The side and rear walls are available in impact-proof hardwood or a combination of hardwood and bars. The doors feature eccentrically adjustable hinges and a built-in lock. The Ratina can be made to measure.

Box design (sizes in mm.)	Kingly Stable	Rembrandt	Ratina
Height of front, side and rear wall	2300	2300	2300
Post with final Construction	2050 in line	2420 in line or V-shape	2300 in line

Night lock	standard	standard	-

The Ratina, this popular design is also available with colour coating (6).

The stately Rembrandt stables with high door. The stable aisle is paved with EvoPave interlocking bricks (7).

Standard horse stalls with luxury finish.

Popular and Professional Corton horse stalls can be finished with a colour coating and extra decoration, such as round door posts. In the Corton showroom, you will undoubtedly come up with ideas of how to give your stable a personal touch. Diverse models and all kinds of decorations make it possible to give every stable its own style.

Open bays.

For horses that are frequently exercised, Corton has designed decorative open bays in various styles.

External doors, shutters and windows.

Corton designs and builds carefully finished external doors, shutters and windows in various shapes and sizes, for example large and small double doors, arched doors and windows which, if desired, can be colour-coated and customised to suit your stable's style.

Corton completes stables.

Luxury sliding doors for inside and outside, indoor exercise track walls with entrances, grooming stations... options are endless. Let us know what you want and Corton will complete your stable in style.

Accessories.

In designer stables, accessories are indispensable. Corton provides a wide range of products, in the colour of your choice.

Doors with style: arched (2) and coated two-part Professional stable door (3), double arched and coated stable doors (7) and impressive sliding doors in Rembrandt style (5).

The Professional stable with colour coating (1).

Professional shutters, modified to the architecture of a listed farmhouse (4).

Grooming station with EvoPave rubber floor (6).
